

**PACRIM, LP SUSPENDS PERMIT APPLICATION
FOR CHUITNA COAL PROJECT**

April 3, 2017

FOR IMMEDIATE RELEASE

This is a great time for the Native Village of Tyonek!

“Our Salmon, our way of life, and our land are safe,” said Arthur Standifer, Tribal President of the Native Village of Tyonek.

We received great news about PacRim Coal, LP, suspending their chase of permits on the Chuitna Coal Project!

Our waters are safe now! We can fish our river without any worries of harmful effects to our waters, our fish, or any marine life, as well as the wildlife that surround the waters of our River.

The Native Village of Tyonek would like to express our deepest gratitude by thanking our Tribal Community, our past tribal leaders, presidents, councilmen, administration, and staff, as well as all who have supported and continued the fight against the PacRim Coal, LP, and the Chuitna Coal Project.

It has been a long, strenuous journey, but it is well worth it, and we, the Native Village of Tyonek, will continue to protect our rivers, our land, and our way of life.
